ARCHDIOCESE OF LOUISVILLE

Memo

To: Principal and Staff
From: Terry A. Crawley
Date: March 29, 2018
Re: **SUMMER INSTITUTE 2018**

Along with this memo and attached to this email you will find the 2018 Summer Institute Catalogues. For your convenience, the sessions from the Office of Faith Formation and the sessions from the Office of Catholic Schools have been placed in separate documents. We ask that you share all of these documents with your entire faculty and staff – including your pre-school staffs. These documents will also be on the Archdiocesan website:

<https://www.archlou.org/professional-development-catalogue/>

Please be sure to check out all of the wonderful workshops, including several multi-day workshops that are being offered to assist you and enhance your professional learning.

Every year we evaluate our Summer Institute processes and try to improve where we are able. In addition to the most recent changes, this year we have asked presenters to provide link(s) for their handouts. Thus we will not be providing (paper) handouts for the sessions.

So that our online registration runs as smoothly as possible, please carefully read and follow the guidelines outlined below:

- **REGISTRATION** - In order to sign up for a class you will need to complete the application online at this link: <https://www.archlou.org/summer-institute/> You must complete all required fields in order for your request to be accepted by the system. Because space in sessions is limited please be aware that not all requests may be able to be honored. We will continue to provide a *Verification Report* that provides the names of those enrolled in sessions. (Additional information about the *Verification Report* is detailed below.)
- **CANCELLATION** - If for any reason you need to **cancel** a request, please contact Debbie McGillicuddy at summerinstitute2018@archlou.org to do so. This is to CANCEL only.
- The first round of registrations will close on Friday - April 27th. As we have done in the past, after that date we will decide to hold, cancel, and/or close workshops. We will publish on the Archdiocesan website a list of all workshops that are cancelled and closed, as well as a list of remaining open workshops. Participants who are closed out of a session because of too few/too many registrations will also be notified by email. We will continue to accept registrations for **open** workshops up to the dates the workshops are held. We will publish a *Verification Report* (a list of all registered participants in each workshop that will be held) on the Archdiocesan website. The first *Verification Report* will be published on Monday – May 7th. It will be updated weekly thereafter until the Summer Institute begins. For a direct link to the *Verification Report*, please go to: <https://www.archlou.org/professional-development-catalogue/>
- Because presenters will be providing links to their materials/resources as well as possibly demonstrating programs/apps, **it is imperative that all participants bring their own devices with them to the Summer Institute**. We will not be able to provide any equipment for participants.

We are trying to make the 2018 Summer Institute our best one yet! I hope you find that the workshops provide relevant and effective professional learning for you and your school.

Sincerely,

Terry A. Crawley

Terry A. Crawley
Coordinator for School Planning and Professional Learning

**Adolescents Wellness and Technology-Understanding and Addressing
Internet and Social Media Addiction with Adolescents**

Workshop ID #1901

Date: **Tuesday - 6/12/18**

Time: **1:00pm–4:00pm (3 hours)**

Location: **Mercy Academy**

Presenter(s): **Eric Baker, Jr. LCADC, LCSW**

Suggested Audience: **Administrators, Counselors, Teachers**

Grade Level: **Intermediate, Middle School, High School**

EILA: **YES**
(credit for Administrators)

LoTi Technology Level: **N/A**

Internet addiction is considered a stimulus and/or novelty driven behavioral addiction. While it is not officially recognized as a diagnosable disorder by the DSM-V, it is a very real and damaging condition, especially with adolescent aged people. In this workshop I provide a lecture and data on the following: How stimulus / novelty addictions work within the brain; What stimulus / novelty addictions looks like; What a healthy relationship with technology looks for adolescent aged children; Research based methods / tools used to encourage self-promoting behaviors; Information on how to effectively approach adolescents and their families on this topic. I will engage participants in an exercise designed to initiate change within their population through building a desire to look at and change their relationship to addictive stimulus such as social media, video games, pornography and other sources of internet addiction. An open discussion for participants to ask questions and provide feedback related to their experience on this topic will be lead as well.

America to Zanzibar: Muslim Cultures Near and Far

Workshop ID #1869

Date: **Tuesday - 6/19/18**

Time: **1:00pm-4:00pm (3-hours)**

Location: **Muhammad Ali Center with (KMAC) Kentucky Museum of Art & Craft**

Presenter(s): **Morgan Szabo and Joanna Miller**

Suggested Audience: **Teachers**

Grade Level: **Primary, Intermediate, Middle School, High School**

EILA: **N/A**
(credit for Administrators)

LoTi Technology Level: **N/A**

Teachers will visit the Muhammad Ali Center to explore the museum's permanent exhibits, as well as its upcoming temporary exhibition, *America to Zanzibar: Muslim Cultures Near and Far*. *America to Zanzibar* is an immersive, interactive exhibition about the diversity of Muslim cultures in our community, country, and the world. It offers children and families exciting hands-on experiences to explore the areas of art, architecture, music, design, trade, and more!

After teachers tour the Muhammad Ali Center, teachers will have the opportunity to engage in an art project at the Center with staff from the Kentucky Museum of Art and Craft (KMAC). This will be the experience that students will have while visiting the Center through a curriculum-based guided tour.

Apps and App Smashing-the Best of IOS 10

Workshop ID #1800-T

Date: **Tuesday – 6/12/2018**

Time: **8:30am-11:30am (3 hours)**

Location: **Mercy Academy**

Presenter(s): **Adele Koch**

Suggested Audience: **Teachers**

Grade Level: **Primary, Intermediate, Middle School**

EILA: **N/A**
(credit for Administrators)

LoTi Technology Level: **2**

Are your iPads unable to update to the newest IOS 10? There are still great apps that work with the earlier versions of IOS. App Smashing is using more than one app for a finished product. It allows our students to be more creative in showing what they know. This session will show several apps that can be smashed together in addition to showing how to determine other apps that are smashable focusing only on apps that can be used with IOS 10. Participants will need an iPad (not updated to IOS 11) for this session.

Apps and App Smashing-the Best of IOS 11 (and beyond!)

Workshop ID #1801-T

Date: **Tuesday – 6/12/2018**

Time: **1:00pm–4:00pm (3 hours)**

Location: **Mercy Academy**

Presenter(s): **Adele Koch**

Suggested Audience: **Teachers**

Grade Level: **Primary, Intermediate, Middle School**

EILA: **N/A**
(credit for Administrators)

LoTi Technology Level: **2**

Have you lost access to some of your favorite apps because of the update to IOS 11? There are still great apps that work with IOS 11, even though some app makers have not updated. App Smashing is using more than one app for a finished product. It allows our students to be more creative in showing what they know. This session will show several apps that can be smashed together in addition to showing how to determine other apps that are smashable focusing only on apps that can be used with IOS 11. Participants will need an iPad (updated to IOS 11) for this session.

LoTi Technology Level: **N/A**

Explore and practice techniques designed to make on-going assessment and feedback simple and effective in ELA classes. Identify the concepts and skills that need to be assessed regularly and discover specific strategies for conducting informal assessment on a regular basis. Learn how to utilize those observations to inform your planning, grouping, and instruction. Explore how to give descriptive feedback and why it is critical to student success. Delve into ideas, scenarios, and strategies for providing students with that feedback in a low-risk, high-impact way.

BERNHEIM Forest (Day 1 of 2)
Teaching Through the Power of Play

Workshop ID #1860

Date: **Tuesday - 6/19/18**

Time: **8:30am-3:30pm (6-hours)**

Location: **Bernheim Arboretum and Research Forest**

Presenter(s): **Claude Stephens and Melissa Rue**

Suggested Audience: **Administrators, Counselors, Teachers**

Grade Level: **Pre-School, Primary, Intermediate**

EILA: **N/A**

(credit for Administrators)

LoTi Technology Level: **N/A**

In this **two-day training program**, participants will learn how to unleash the power of play to enhance student engagement and improve outcomes for children, particularly their social and emotional, as well as physical and cognitive, development. Through lecture and hands-on activities, participants will understand the research supporting the many benefits of free play and learn how to integrate play, loose parts, risk and natural materials inside and outside of the classroom. Complete details for this two-day institute are available at:

<https://childrenatplaynetwork.com/training-programs/training-institutes/>

[This **two-day** institute is pre-approved to provide up to ten hours of ECE-TRIS professional development for Early Childhood Educators]

Beyond Basic Calculations: Using Technology to Increase Rigor in Mathematics Class

Workshop ID #1802-T

Date: **Monday - 6/11/2018**

Time: **8:30am-11:30am (3 hours)**

Location: **Mercy Academy**

Presenter(s): **Sister Kathy Cash**

Suggested Audience: **Teachers**

Grade Level: **Middle School, High School**

EILA: **N/A**
(credit for Administrators)

LoTi Technology Level: **2**

This session is intended for middle and high school teachers who are looking at ways to incorporate more technology in their everyday classroom activities. The session will look at some of the historical technologies used in math classrooms (e.g. calculators) but will focus on newer programs and websites that can help develop students' mathematical engagement and thinking. Specifically, this session will explore the use of:

- Three-act videos/lessons
- Desmos online calculator and activity builder
- Calculation Nation
- Estimation 180

Teachers attending this session can expect to walk away from the session with some specific ways to incorporate technology immediately into their mathematics classrooms and also a set of resources for exploring more technology applications for mathematics.

**Beyond the Numbers:
Using Qualitative Inquiry in Pedagogy and Assessment**

Workshop ID #1880

Date: **Wednesday - 6/20/18**

Time: **1:00pm-4:00pm (3-hours)**

Location: **Flaget Center**

Presenter(s): **Thomas Malewitz**

Suggested Audience: **Teachers**

Grade Level: **Intermediate, Middle School, High School**

EILA: **N/A**
(credit for Administrators)

LoTi Technology Level: **N/A**

This workshop is designed to help introduce educators to the use and purpose of qualitative inquiry and assessment in the arts and humanities. Sometimes students feel like their identity is bound to a number: a test score, a value compared to their siblings or peers, or even just a student number. This workshop is to explore how to bring dignity back to a student's self-worth through assessments that explore their strengths. Qualitative inquiry allows an educator to offer students an approach to learning through expansive discovery and multi-modal assessment, while within the expectations of the curriculum.

Brain-Based Learning and Literacy

Workshop ID #1897

Date: **Friday - 6/22/18**

Time: **8:30am-11:30am (3-hours)**

Location: **Flaget Center**

Presenter(s): **Beatriz Pacheco**

Suggested Audience: **Administrators, Counselors, Teachers**

Grade Level: **Primary, Intermediate, Middle School, High School**

EILA: **YES**
(credit for Administrators)

LoTi Technology Level: N/A

This session will feature new information regarding brain plasticity and its potential impact on literacy attainment at all stages (from kindergarten through 12th grade). The 12 principles of brain-based learning will be highlighted, and Dr. Pacheco will share excerpts from her recently published book “The Human Digital Brain: How Multidirectional Thinking is Changing the Way We Learn.” This session will also feature the results of research conducted by Dr. Pacheco regarding the impact of technology on literacy attainment for high school boys who struggle with vocabulary and comprehension skills. A variety of strategies for teaching vocabulary and comprehension skills utilizing both traditional methods and technology will also be discussed.

Children's Choir Workshop

Workshop ID #1858

Date: **Monday - 6/18/18**

Time: **1:00pm-4:00pm (3-hours)**

Location: **St. Albert**

Presenter(s): **Meg Matuska**

Suggested Audience: **Music Teachers**

Grade Level: **Primary, Intermediate, Middle School**

EILA: **N/A**
(credit for Administrators)

LoTi Technology Level: **N/A**

Many Catholic Schools in the Archdiocese have school choirs that regularly sing for school Masses and to a varying degree at weekend liturgies. This workshop will cover techniques for teaching musical skills as well as the liturgy. We'll look at music designed for K-8 students utilizing songs/hymns/chants that cover all styles. How to work with student cantors will also be touched upon. Time will also be allowed for the sharing of "best practices" among the various school/parish music programs with the Archdiocese.

Sponsored by Archdiocese of Louisville National Association of Pastoral Musicians.

**Dealing with Difficult Parents and Challenging Family Systems
(Grades Pre-School-8)**

Workshop ID #1889

Date: **Thursday - 6/21/18**

Time: **8:30am-11:30am (3-hours)**

Location: **Flaget Center**

Presenter(s): **Eli A. Karam, Ph.D**

Suggested Audience: **Teachers**

Grade Level: **Pre-School, Primary, Intermediate, Middle School**

EILA: **N/A**
(credit for Administrators)

LoTi Technology Level: **N/A**

Besides the obvious challenges of classroom management and curriculum development, teachers often have to face the difficulty of having to work with demanding family systems. While many parents are helpful, cooperative and responsive, some can be exceedingly challenging. These parents can yell, accuse, criticize, act belligerently, entitled, defensive or, conversely, fail to be in contact entirely. Understandably, many teachers frustrated and bewildered by this behavior. Some take it personally and wonder what they have done. Others may dismiss it, and so doing, neglect pursuing that relationship at all.

In this workshop, participants will:

- 1) explore challenging situations you encounter at your school with parents
- 2) learn adaptive coping strategies for building healthy alliances with difficult parental stakeholders
- 3) practice communication & feedback skills with your colleagues.

Encouraging Productive Conversation in the Math Classroom

Workshop ID #1879

Date: **Wednesday - 6/20/18**

Time: **8:30am-11:30am (3-hours)**

Location: **Sacred Heart Academy**

Presenter(s): **Gina Wilkie**

Suggested Audience: **Teachers**

Grade Level: **Middle School, High School**

EILA: **N/A**
(credit for Administrators)

LoTi Technology Level: **N/A**

In order to maximize learning, research suggests that 40% of class time should be spent on student dialogue. Students who talk are students who learn, but only if the conversation is on topic. Teachers can provide opportunities for this type of guided conversation by implementing carefully designed partner activities that bring students together around particular learning tasks. These activities increase engagement and understanding, while also addressing students' socio-emotional needs for movement and interaction with classmates. Partner activities also allow for seamless differentiation for individualized student learning. In this session, I will share specific activities and techniques that I have used successfully in my middle school and high school math classrooms and provide time and guidance as you adapt them to your own curriculum.

At least one resource will be online, so participants are asked to bring a laptop or iPad.

Integrating Dalcroze Eurhythmics in the Music Curriculum

Workshop ID #1865

Date: **Tuesday - 6/19/18**

Time: **8:30am-11:30am (3-hours)**

Location: **Ascension**

Presenter(s): **Holly Smith**

Suggested Audience: **Teachers**

Grade Level: **Pre-School, Primary, Intermediate, Middle School**

EILA: **N/A**
(credit for Administrators)

LoTi Technology Level: **N/A**

The primary objective of this session is to help music teachers find meaningful ways to include Dalcroze-based movement in lessons that meet national education standards and have assessment opportunities. The key-components of this session will include differentiation in the music classroom for all primary, intermediate, and middle school levels; student engagement activities to engage students in focus throughout the entire lesson; performance-based assessment and data collection and analysis to adapt instruction as necessary based on student learning; and incorporating social and emotional learning in music instruction. Lesson ideas will present sequential activities that teach various musical concepts. Concentration, rhythmic integrity, artistic movement, and social integration are key components in Dalcroze eurhythmics. Differentiated phases of each activity will be presented - introductory, beginning, intermediate and advanced. Participants will receive sample lesson plans, assessment rubrics, and differentiation suggestions.

Introducing AP[®] with WE Service

Workshop ID #1895

Date: **Thursday - 6/21/18**

Time: **1:00pm-4:00pm (3-hours)**

Location: **Flaget Center**

Presenter(s): **TBD from WE Service**

Suggested Audience: **Administrators, Counselors, Teachers**

Grade Level: **High School**

EILA: **YES**
(credit for Administrators)

LoTi Technology Level: **N/A**

This session will provide an introduction to AP[®] with WE Service, a new program designed in exclusive partnership between the College Board and WE. AP[®] with WE Service offers AP[®] teachers the opportunity to incorporate service learning into their existing AP[®] courses. Service learning is an academic pedagogy where students perform service, based on a structured academic foundation. The program is currently available in six AP[®] courses: AP[®] Computer Science A, AP[®] Environmental Science, AP[®] European History, AP[®] Human Geography, AP[®] Spanish Language and Culture, and AP[®] Studio Art: 2D Design. Educators who apply to the program will have the opportunity to select from two curriculum modules that have been carefully developed by the College Board, WE, and AP[®] teachers to align with the AP[®] Course Framework, as well as enable teachers and students to examine and engage with relevant coursework through a local, national, and global context.

**Is This Another Dead Artist? No, Not This One!
A Mix of Old and New Artists**

Workshop ID #1863

Date: **Tuesday - 6/19/18**

Time: **8:30am-11:30am (3-hours)**

Location: **St. Agnes**

Presenter(s): **Laura Dant and Carey Given**

Suggested Audience: **Teachers**

Grade Level: **Primary, Intermediate, Middle School**

EILA: **N/A**
(credit for Administrators)

LoTi Technology Level: **N/A**

Does teaching about living artists take you out of your comfort zone? Come learn and explore the art of contemporary and modern artists. The work of these artists will allow you to easily connect and integrate art into other subject areas, plus help your students see the connection between art and the world around them. Participants will also learn new lesson ideas for some of our “old” favorite artists. Upon leaving this session you will have a wealth of lesson ideas, examples and handouts.

Let's Take a Trip: Google Expeditions in the Classroom

Workshop ID #1806-T

Date: **Friday - 6/15/18**

Time: **8:30am-11:30am (3 hours)**

Location: **St. Albert the Great**

Presenter(s): **Bill Henderson**

Suggested Audience: **Administrators, Teachers**

Grade Level: **Pre-School, Primary, Intermediate, Middle School, High School**

EILA: **N/A**
(credit for Administrators)

LoTi Technology Level: **1**

Google Expeditions is one of the newest tools in their suite of apps to enhance education. Imagine being able to take your students to the moon, the Amazon rainforest, the ocean floor, the Globe Theater, inside the human heart and on a college campus tour all in the same day. Sound exhausting and expensive, right? It's cheaper and easier than you think! In this session we will explore all of the amazing opportunities Google Expeditions open up in your classroom. Not just how it can work in the classroom but how you as a teacher can confidently take your students on a virtual field trip. With more than 500 different destinations these devices can be easily incorporated into many subject areas and classrooms.

We will explore what all is included in a classroom kit, classroom best practices and how to build your own kit as well as how to still incorporate this into your curriculum without a kit.

(And yes, of course, we will take a few trips during the session.)

Make Google Work for You

Workshop ID #1810-T

Date: **Monday - 6/11/18**

Time: **8:30am–11:30am (3 hours)**

Location: **Mercy Academy**

Presenter(s): **Joe Reed**

Suggested Audience: **Administrators, Teachers**

Grade Level: **Primary, Intermediate, Middle School, High School**

EILA: **N/A**
(credit for Administrators)

LoTi Technology Level: **2**

Don't we all want to work smarter and not harder? We're all surrounded by class lists, schedules, files, reports, data, more data, and even more data. Wouldn't it be nice if you had a hub to house and process this information, and then, when Accreditation comes along, these files are magically where they need to be? Participants will learn from a Google Certified Educator Level 1 & 2, how to fully utilize Google Drive and many other G Suite for Education tools beyond the basics to become experts in this digital age. Learn how one school has completely revamped file management and spent more time focusing on our Accreditation Improvement Priorities than on figuring out how and where to put those evidence files. Leave this session with tools to make your Front Office run at full potential with our File Management System (FMS if you love acronyms) using Google Drive; unlock the power of Gmail to fight your inbox fatigue; and explore new Google apps that are designed to work for you.

Come and enjoy a [two-day training](#) filled with practical guidelines that provide the what, when, where, how and why to successful school-wide implementation of differentiated instruction. Explore what practical differentiation looks like and how it results in higher levels of student engagement and success. Take a look at how and when to implement an initiative that includes differentiated instructional strategies and activities, driven by informal and formal feedback, data and differentiated assessment strategies in all grade levels and classrooms. Work as teams to be ready to jump start differentiated instruction at your school by the end of the training. Explore general school-wide implementation guidelines that include:

- * how to establish a growth mindset and environment for differentiation with other teachers, students and parents
- * how to plan and teach differentiated lessons based on a standards-based curriculum implemented with mindful curriculum mapping and backwards planning, and specific goal focused lessons
- * how to plan and teach differentiated lessons with the critical elements of differentiated lessons including content, process, product, affect/environment, and learning profiles, interests, readiness levels
- * practical high-impact, low-preparation differentiated instructional and assessment strategies based on the critical elements of differentiated instruction such as anchor activities, carousel, chunked instruction, cubing, flexible grouping, gallery walk, jigsaw, tiered instruction, and more
- * classroom management strategies that improve student engagement and create independent learners that improve in cognizant reflection of their own decisions as learners and citizens through gradual release of responsibility
- * assessment driven instruction through feedback, data-based assessments and observations, including pre, formative and summative assessments, problem-based learning and performance-based assessments
- * 21st century skills, critical thinking skills, various types of questioning including essential questions, higher order thinking and questioning, reflective thinking and questioning, and communication skills critical to coaching others in the pursuit of goal-based continuous improvement

LoTi Technology Level: **N/A**

We will look at several artists working today that may interest middle school students. It is sometimes difficult to surprise and delight this age group, and it takes some unusual and different subject matter to interest them. This will be a hands-on session as we will create our own artwork in response to the artists' work. We will make as many artworks as we have time for! The artworks will be in mixed media/collage and clay. Much of the subject matter includes faces. It will be an enlightening session as we partake in a valuable artworking experience and make projects just like our students do.

Let's take a look at Seesaw! In this session I will introduce the basics of this great program and its uses as a digital portfolio, with student, teacher and parent/home integration. During this class we will explore the uses of Seesaw, the free program, in the classroom. You will learn to log in as a student and join my class, as well as see your work from the parent portal too. There will be opportunities for you to try out all the available options for having your students utilize 21st Century learning skills as they reflect on their learning. This program works on laptop and desktop computers, as well as mobile devices such as iPhones, iPads and Android devices. We will discuss how to use this in a classroom that has one, several or whole class access to devices. If you have never heard of Seesaw or are just starting out in your own classroom this session is for you. This will be a hands-on class. Please bring a device such as an iPhone, iPad or Android device with the Seesaw application preloaded or a laptop for accessing the web.

If you are wanting to dig further into Seesaw, please make sure to sign up for Seesaw 102!

LoTi Technology Level: **N/A**

The best way to promote reading in your school library is to show students a variety of titles. Ten nominee titles are chosen for the Kentucky Bluegrass Award each year. These ten titles showcase a variety of genre, art medium, and topics. Many lessons can be planned for the library using these books. This program will present the books with lessons based on the library (21st Century Learner Skills) and ELA standards for Kindergarten, 1st and 2nd grades. The lessons will include diverse activities to reach each student. There will be extra ideas presented for each book at add differentiation, music or art activities, technology and creation ideas, writing activities, genre studies, or student response to literature.

NOTE: This session will be held in the Sacred Heart Model School LIBRARY

The Danielson Group/Day 2 - Learning-Focused Conversations

Workshop ID #1859

Date: **Tuesday - 6/19/18**

Time: **8:30am-3:30pm (6-hours)**

Location: **Flaget Center**

Presenter(s): **Ann Cummins-Bogan (The Danielson Group)**

Suggested Audience: **Administrators, Teachers**

Grade Level: **Primary, Intermediate, Middle School, High School**

EILA: **YES**
(credit for Administrators)

LoTi Technology Level: **N/A**

In this workshop, participants learn how to use structures and tools to conduct conversations, and to use data to analyze professional practice and determine areas and directions for growth. The Learning-Focused Conversations model developed by Laura Lipton and Bruce Wellman links these conversation skills to the components of the Framework for Teaching. Participants explore conversation templates and skills that foster reflection and growth through thoughtful engagement about professional practice. They acquire practical strategies for navigating across a Continuum of Interaction from calibration.

The Danielson Group/Day 3 – Student Engagement

Workshop ID #1872

Date: **Wednesday - 6/20/18**

Time: **8:30am-3:30pm (6-hours)**

Location: **Flaget Center**

Presenter(s): **Ann Cummins-Bogan (The Danielson Group)**

Suggested Audience: **Administrators, Teachers**

Grade Level: **Primary, Intermediate, Middle School, High School**

EILA: **YES**
(credit for Administrators)

LoTi Technology Level: **N/A**

Student engagement in learning is the centerpiece of the Framework for Teaching; all other components contribute to it. When students are engaged in learning, they are not merely “busy,” nor are they only “on task.” Rather, they are intellectually active in learning important and challenging content. The critical distinction between a classroom in which students are compliant and busy and one in which they are engaged is that in the latter, students are developing their understanding through what they do.

Participants will take a deep dive into Danielson’s Framework for Teaching, Component 3c: Engaging Students in Learning and develop and share strategies that align with the attributes of engagement. Connections will be made to the other domains and components that influence engagement in the classroom.

Think Like an Imagineer: STEM & Inquiry Activities Kids Love

Workshop ID #1814-T

Date: **Tuesday - 6/12/18**

Time: **8:30am–11:30am (3 hours)**

Location: **Mercy Academy**

Presenter(s): **Lori Elliott (SDE)**

Suggested Audience: **Administrators, Counselors, Teachers**

Grade Level: **Primary, Intermediate, Middle School, High School**

EILA: **N/A**
(credit for Administrators)

LoTi Technology Level: **0**

Let your imagination go wild as we explore how to increase higher order thinking through inquiry and STEM activities! Learn how to think like an Imagineer! You will learn how to connect the design process with favorite children's movies and books. You will leave with a toolkit full of activities to use in your classroom to build interest in science, technology, engineering, mathematics, and MORE!

Tinker, Create, Imagine, and Make! (Kentucky Science Center)

Workshop ID #1891

Date: **Thursday - 6/21/18**

Time: **8:30am-11:30am (3-hours)**

Location: **Kentucky Science Center**

Presenter(s): **Mellisa Blankenship and Veronica Greenwell**

Suggested Audience: **Teachers**

Grade Level: **Primary, Intermediate, Middle School**

EILA: **N/A**
(credit for Administrators)

LoTi Technology Level: **N/A**

Based off of our own STEAM initiatives, explore the first steps to the “Maker Movement” and how it can start in your classroom or school. Science and Engineering practices do not always mean building something or memorizing content! Asking questions and finding solutions is the first step to critical thinking in the classroom. Discover cheap and useful methods for bringing science and engineering into any subject. Level one material like duct tape, cardboard, and your imagination can pave the way to a tinkering studio for your students to use their inventor skills that will hone in on 21st Century Learning skills like collaboration, problem-solving, and creativity.

Toxic Stress – Trauma in the Classroom

Workshop ID #1850

Date: **Monday - 6/18/18**

Time: **8:30am-3:30pm (6-hours)**

Location: **Flaget Center**

Presenter(s): **Patrick Wagner**

Suggested Audience: **Administrators, Counselors, Teachers**

Grade Level: **Primary, Intermediate, Middle School, High School**

EILA: **YES**
(credit for Administrators)

LoTi Technology Level: **N/A**

Toxic stress is a term used to describe any situation that has impacted our ability to cope and function on a daily basis. Our students and teachers are impacted greatly by their environments inside and outside of the classroom. Due to the trauma and violence of our communities and country, our classrooms are having to become more adaptive to understanding the growing needs that can effectively empower students to grow and learn in the current climate. Teachers alike, need to be aware of the stress and utilize new effective interventions to support and shape their decisions. This training will work to improve teacher's ability to combat stress and encourage more social emotional interventions to support students grow and development.

**Using the Bully Pulpit:
A Christian Ministerial Response to the Violence of Bullying**

Workshop ID #1852

Date: **Monday - 6/18/18**

Time: **8:30am-11:30am (3-hours)**

Location: **Flaget Center**

Presenter(s): **Kevin Dowd**

Suggested Audience: **Administrators, Teachers**

Grade Level: **Primary, Intermediate, Middle School, High School**

EILA: **YES**
(credit for Administrators)

LoTi Technology Level: **N/A**

In this workshop bullying will be defined in contrast to other forms of youth violence and conflict, and we will examine the fruits of recent scholarship addressing bullying in our schools and communities. We will look at difficult cases that compel us to think of bullying as a genuine social justice and pro-life issue, that is, an issue that religious leaders have a rightful and critical place addressing, while also emphasizing that most of the violence is “hidden.” Participants will be engaged in a multi-media presentation that will encourage them to draw from their own experiences as well as to learn from one another. We will especially consider the role that religious leaders (priests, DRE’s and catechists, youth ministers, etc.) could/should play in addressing the violence that is bullying. The workshop will conclude with concrete steps we can take to become part of the solution, working towards a whole-community approach that gets us past the false notion that bullying is only “the schools’ problem.”

Utilizing Blended Learning to Teach Critical Life Skills

Workshop ID #1862

Date: **Tuesday - 6/19/18**

Time: **8:30am-11:30am (3-hours)**

Location: **Flaget Center**

Presenter(s): **Alana Teller (EVERFI)**

Suggested Audience: **Administrators, Counselors, Teachers**

Grade Level: **Primary, Intermediate, Middle School, High School**

EILA: **YES**
(credit for Administrators)

LoTi Technology Level: **N/A**

Looking for supplemental web-based resources that teach and assess standards? [EVERFI](#) partners with forward-leaning organizations to provide interactive, scenario-based, self-assessing resources at **no cost**. Topics include Financial Literacy, STEM, Health and Wellness, Career Leadership and Success and Diversity and Inclusion. All courses can be integrated into unit plans either during class time, as a capstone project or in flipped classrooms. In this session, you will learn about resources offered for the 2018-2019 school year, how to register an account, create classes, and incorporate these resources into blended learning lesson plans for Financial Literacy, STEM, Heath/Wellness, Citizenship/Diversity, and more!

Visual Study Guides for Improved Test Taking Skills

Workshop ID #1900

Date: **Friday - 6/22/18**

Time: **8:30am-11:30am (3-hours)**

Location: **Flaget Center**

Presenter(s): **Kimberly Hudson (The Curious Edge)**

Suggested Audience: **Teachers**

Grade Level: **Middle School, High School**

EILA: **N/A**
(credit for Administrators)

LoTi Technology Level: **N/A**

Visual study guides help a student actively learn information, rather than rely on verbatim memorization skills. Teachers will learn how to incorporate this teaching strategy into their instruction, as well as train their students to use this tool to learn course content. Tests often involve the regurgitation of memorized information. Help your student transform their learning and become an active learner, rather than a person who simply memorizes information and hits “eject” as soon as the test has been taken. This technique allows the student to learn the information, retain in both working memory and long-term memory, better assisting in gaining additional knowledge. This transforms the ability for application of learned information. Students become engaged learners, which sets the foundation for metacognitive learning.

**WE Schools (Part 1 of 2):
Service Learning Theory (Design or Refine A Plan)**

Workshop ID #1876

Date: **Wednesday - 6/20/18**

Time: **8:30am-11:30am (3-hours)**

Location: **Flaget Center**

Presenter(s): **Elizabeth Bogart, Jessica Pesola and Brianna Pienkowski (WE Schools)**

Suggested Audience: **Counselors, Teachers**

Grade Level: **Pre-School, Primary, Intermediate, Middle School, High School**

EILA: **N/A**
(credit for Administrators)

LoTi Technology Level: **N/A**

NOTICE: This full day session will be divided into two parts.

During this time, we will deep dive into service-learning theory and dig into the WE Schools Kit and examine what service-learning looks like across various implementation models (integrated in the classroom, advisory or homerooms, or within an existing or new extra-curricular club). Educators will walk away having decided which implementation style works for their students as well as plan for their first month of “investigating and learning.”

**WE Schools (Part 2 of 2):
Develop Student Leadership through a WE Take-Action Campaign
(Co-planning and Best Practice Sharing)**

Workshop ID #1881

Date: **Wednesday - 6/20/18**

Time: **1:00pm-4:00pm (3-hours)**

Location: **Flaget Center**

Presenter(s): **Elizabeth Bogart, Jessica Pesola and Brianna Pienkowski (WE Schools)**

Suggested Audience: **Counselors, Teachers**

Grade Level: **Pre-School, Primary, Intermediate, Middle School, High School**

EILA: **N/A**
(credit for Administrators)

LoTi Technology Level: **N/A**

NOTICE: This full day session will be divided into two parts.

This session is for educators who are developing their understanding of service-learning theory, and want time to collaborate with colleagues to further foster student leadership through service learning projects. Educators will self-select how they want to deep dive into our thematic resources, integrate WE Take Action Campaigns with their current curriculum, and link learning to service-actions through pre-service exploration or post-service reflection.

What's New from NAEA

Workshop ID #1854

Date: **Monday - 6/18/18**

Time: **8:30am-11:30am (3-hours)**

Location: **St. Agnes**

Presenter(s): **Laura Dant, Carey Given and Tiffany Whelan**

Suggested Audience: **Teachers**

Grade Level: **Pre-School, Primary, Intermediate, Middle School**

EILA: **N/A**
(credit for Administrators)

LoTi Technology Level: **N/A**

Participants will learn the newest ideas in art education that were presented at the National Art Education conference. One focus will be placed on STEAM education – the theme of this year's conference. Emphasis will also be placed on collaboration, differentiation, and the rich art culture of the Pacific Northwest. Participants will leave with new ideas, examples and handouts.

**You Be the Chemist Essential Elements (Grades K-4)
presented by the Chemical Education Foundation**

Workshop ID #1878

Date: **Wednesday - 6/20/18**

Time: **8:30am-11:30am (3-hours)**

Location: **Our Lady of Lourdes**

Presenter(s): **Vicki Bryan**

Suggested Audience: **Teachers**

Grade Level: **Primary, Intermediate**

EILA: **N/A**
(credit for Administrators)

LoTi Technology Level: **N/A**

CEF's *You Be The Chemist* Essential ElementsSM program is a professional development workshop designed to provide K–8 educators—our “essential elements” in education—with methods for teaching chemistry concepts through hands-on learning and real-world connections.

Essential Elements is based on the 5E learning cycle approach to teaching, which is based in the theory of constructivism. Through this cycle, students build their own understanding of new concepts from both prior and new experiences. Each part of the cycle describes a phase of learning: engage, explore, explain, elaborate, and evaluate. During an Essential Elements workshop, the instructor will lead educators through a full 5E learning cycle utilizing a lesson from the Activity Guides. Educators then get a chance to collaborate and plan their own 5E lesson from additional Activity Guide lessons.

All attending educators receive a Periodic Table poster, an Activity Guide flash drive, along with additional CEF giveaways.
